

NEHA PARMAR

Technical Product Manager (Aspiring) | Frontend Engineering Background | Full Product Lifecycle Ownership
Bangalore, India | Available immediately | +91 8871545193 | neha.parmar06@gmail.com | linkedin.com/in/nehaparmar06

PROFESSIONAL SUMMARY

Technical product professional with 10 years of frontend engineering experience across logistics and financial services, currently transitioning formal ownership of the product lifecycle — stakeholder requirement gathering, UX prototype validation, backlog prioritization and estimation, cross-functional delivery, and stakeholder demos — into a dedicated Technical Product Manager role. Combines hands-on engineering depth (Vue.js, JavaScript, TypeScript) with a Google UX Design Professional Certificate, enabling direct evaluation of design and usability trade-offs. Experienced leading cross-functional Scrum teams and mentoring engineers.

CORE COMPETENCIES

- Stakeholder requirement gathering and story refinement with Business Analysts
- UX collaboration: wireframe and prototype review, stakeholder sign-off before development
- Backlog refinement, estimation, and cross-functional Scrum task planning
- End-to-end delivery ownership: dev → pre-prod → QA → production, with DevOps coordination
- Release risk mitigation and pre-release defect resolution
- Stakeholder demos, feedback capture, and iterative refinement
- Technical fluency: Vue, JavaScript, TypeScript, REST API Integration, Vuex state management
- AI-augmented delivery workflows: Claude Code, GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Engineer III (SDE-3) — Technical Product Ownership

Oct 2021 – Jun 2026

Maersk Global Service Centre, Bangalore

Owned the end-to-end delivery lifecycle for Maersk GSC initiatives, including Self-Service Instant Booking (SSIB), the five-screen customer booking application behind Maersk Spot. Ran product ownership activities — requirement gathering, story refinement, UX validation, backlog planning, cross-functional delivery, and stakeholder demos — alongside hands-on engineering.

- Gathered requirements directly from stakeholders and partnered with Business Analysts on story refinement ahead of each development cycle.
- Collaborated with UX designers on wireframes and prototypes for the booking flow, securing stakeholder sign-off before development began.
- Led backlog refinement and estimation, then coordinated task division across a cross-functional Scrum team of engineers, QA, and DevOps.
- Proposed a scoped-down v1 for the Container Details step of the booking flow instead of the full-featured version, reducing release risk; proposal was accepted by the team.
- Diagnosed a state-management defect during pre-release verification that would have blocked customers from completing bookings and resolved it cross-functionally before launch.
- Carried features through pre-prod, QA, and production release, then provided post-launch support while scoping new requirements concurrently.
- Presented completed work to stakeholders before deployment, incorporating feedback into iteration.
- Introduced AI-assisted workflows (Claude Code, GitHub Copilot) into delivery, including cross-repository debugging and test scaffolding.
- Mentored 5 frontend engineers through code review and pair programming; helped shape the team's frontend standards.

Senior Frontend Developer

Nov 2018 – Sep 2021

FIS Global, Bangalore

- Delivered Starlight, the Online Account Opening and Online Banking suite on FIS's IFS platform, enabling customers of small US banks to open accounts fully online — partnering with Business and Product stakeholders on requirements and multi-step form flows.
- Led code reviews and pair programming sessions; drove architectural improvements across the frontend codebase.

Frontend Developer

Mar 2016 – Oct 2018

Fidelity National Financial India, Bangalore

- Owned frontend delivery end-to-end from discovery through production release for 14 cross-brand mobile apps (10K+ users), on a shared component base.

- Challenged a two-menu navigation spec during design review, proposing a single nested-menu design; adopted as shipped to simplify user navigation.

EDUCATION & CERTIFICATIONS

- Google UX Design Professional Certificate, 2024 — UI/UX principles, design systems, Figma, usability testing
- PG Diploma in Software Development (Full Stack), IIIT Bangalore, 2019
- PG Diploma in Advanced Computing, CDAC Bangalore, 2016
- B.E. Electrical Engineering, SSCET, Bhilai, 2015
