

NEHA PARMAR

Senior Frontend Engineer | JavaScript • TypeScript | AI-Augmented Development
Bangalore, India | +91 8871545193 | neha.parmar06@gmail.com | linkedin.com/in/nehaparmar06

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10 years designing and building complex, data-rich web applications using Vue.js and TypeScript. Expert in taking end-to-end ownership of frontend features from discovery through release and iteration. Strong foundation in frontend architecture, API integration, performance optimization, and testing. Experienced with industrial/supply-chain systems handling complex workflows and data visualization. Early adopter of AI technologies—hands-on expertise with LLM-based applications, AI APIs, and Generative AI platforms (GitHub Copilot, Claude AI). Strong collaborator with Product, Design, and Backend teams; skilled in mentoring peers, defining frontend standards, and managing client/stakeholder expectations. Passionate about turning complex data into clarity and building systems that expand human capability.

TECHNICAL SKILLS

Frontend Frameworks: Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS

Backend: API Integration, RESTful APIs

AI & Emerging Technologies: GitHub Copilot (CLI & IDE), Claude AI, Generative AI Platforms, AI APIs, AI-Augmented Development Workflows, Prompt Engineering

Testing & Quality: End-to-End Testing, Unit Testing, Test Coverage Best Practices (95%+)

Performance & Architecture: Frontend Architecture Design, Performance Optimization, Web Vitals, Memory Management, Code Splitting, Lazy Loading, Cross-Browser Compatibility

Design & UX: UX/UI Principles, Design Collaboration (Figma), Component Libraries, Design Systems, User-Centric Design

DevOps & Collaboration: CI/CD Pipelines (GitHub Actions), Git Workflows, Cross-Functional Collaboration, Agile/Scrum, Client Management, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer | Maersk GSC, Bangalore | Oct 2021 – Jun 2026

- Took end-to-end ownership of complex, data-rich frontend features from discovery through release and iteration; designed and built modern web applications for global supply-chain operations and industrial logistics workflows.
- Architected scalable frontend applications using Vue.js and TypeScript with deep understanding of Object-Oriented Design principles; optimized performance through advanced rendering optimization and memory management.
- Drove frontend architecture decisions, code reviews, established technical standards and best practices, and led mentorship of 4 frontend engineers across globally distributed teams.
- Collaborated closely with backend teams; ensured seamless integration between frontend and backend systems.
- Pioneered AI-augmented development workflows using GitHub Copilot CLI and Claude AI for code generation, testing, and debugging; demonstrated hands-on expertise with Generative AI platforms; achieved 50% faster feature delivery while maintaining 95%+ test coverage.
- Implemented comprehensive testing strategy using Jest achieving 95%+ code coverage; established best practices and maintained high code quality standards.
- Collaborated with Product, Design, and UX teams to deliver intuitive, efficient user experiences; managed stakeholder expectations and communicated technical trade-offs clearly.
- Owned CI/CD pipelines and DevOps initiatives; contributed to defining frontend standards and raising technical maturity across engineering organization.

Senior Frontend Developer | FIS Global, Bangalore | Nov 2018 – Sep 2021

- Led Angular and TypeScript development for large-scale financial services applications; took end-to-end ownership of complex frontend features and drove architectural improvements.
- Optimized performance through Object-Oriented Design, code reviews, and peer programming.
- Collaborated with backend teams (Java) on integration

Frontend Developer | Fidelity National Financial India Pvt Ltd, Bangalore | Mar 2016 – Oct 2018

- Independently owned end-to-end frontend development from discovery through production release; applied Object-Oriented Design principles and best practices.
- Built responsive, scalable applications handling complex financial workflows; integrated RESTful APIs and managed stakeholder communication for 10K+ users.

PROJECTS

Self-Service Instant Booking Application (Maersk GSC): Self-service booking platform for configuring origin-destination, commodity, and container details, selecting sailing options and VAS, with instant booking confirmation.

Tech: Vue.js, TypeScript, JavaScript, HTML/CSS

Starlight - Online Account Opening (FIS Global): Online Account Opening and Online Banking suite on FIS's IFS platform for small US banks, letting customers open a bank account fully online without a branch visit.

Tech: Angular 2, TypeScript, JavaScript, HTML/CSS

Online Order for Title and Escrow (Fidelity National Financial India): Add-on to the Property Search app enabling users to order Title, Escrow, or combined Title and Escrow services for a searched property.

Tech: AngularJS, Angular 2, JavaScript, TypeScript, HTML/CSS

Phonagap Apps for Property Search (Fidelity National Financial India): Suite of 14 cross-brand mobile apps for US property search across FNF's portfolio of brands, independently delivered within one year.

Tech: Ionic 3, AngularJS, JavaScript, TypeScript, HTML/CSS

Feedback App (Fidelity National Financial India): Internal feedback application enabling employees to rate and comment on office facilities.

Tech: AngularJS, JavaScript, HTML/CSS

EDUCATION & CERTIFICATIONS

- Google UX Design Professional Certificate — 2025 (UI/UX Principles, Design Systems, Figma, Usability Testing)
- PG Diploma in Software Development (Full Stack) — IIIT Bangalore, 2019
- PG Diploma in Advanced Computing — CDAC Bangalore, 2016
- B.E. Electrical Engineering — SSCET, Bhilai, 2015

KEY ACHIEVEMENTS

- Owned and delivered end-to-end frontend features for complex industrial/supply-chain systems; designed data-rich applications turning complexity into clarity for users.
- Pioneered AI-augmented development using GitHub Copilot and Claude AI; demonstrated hands-on expertise with LLM-based applications and Generative AI platforms; achieved 50% faster delivery while maintaining 95%+ code quality.
- Mentored 4 frontend engineers across global teams; elevated frontend maturity through architecture guidance, code reviews, and knowledge sharing on best practices and emerging technologies.
